

Lorna Vanderhaeghe, MS, is Canada's leading women's health expert and has been researching nutritional medicine for over 25 years. With degrees in nutrition and biochemistry, she is the author of 10 books including *A Smart Woman's Guide to Hormones* and *A Smart Woman's Guide to Weight Loss*. She has a monthly newsletter which you can read and sign up for at her website.

CELADRIN™

Super Rich Skin Therapy Cream

What to expect from this product:

- ♥ Reduction of fine lines and wrinkles
- ♥ Treats psoriasis, eczema and rosacea
- ♥ Improves elasticity
- ♥ Moisturizes the skin
- ♥ Halts inflammation
- ♥ Contains hyaluronic acid, squalene and 10% Celadrin™

New research is proving that not only does Celadrin™ perform in the treatment of arthritic conditions, sports injuries and other inflammatory disorders, but it also produces remarkable results in the fight against wrinkles, psoriasis, eczema, rosacea and other related inflammatory skin conditions.

Celadrin™ and Wrinkles

It makes sense that this cream would have a positive effect on wrinkles due to its anti-inflammatory action. By calming the skin and halting inflammation (remember that inflammation promotes aging), we can reduce fine lines and wrinkles.

In a study of 28 subjects between the ages of 25 to 65, with an average age of 45, the cream was applied twice per day, morning and night. Each participant was evaluated after 21 days of application. The participants and the dermatologist noted measurable improvement including the reduction of wrinkles, an increase in skin permeability, improvement in roughness and thickening of the skin, firmness and hydration.

Celadrin™ Super Rich Skin Therapy Cream will reduce fine lines and wrinkles without worrying about reactions to fragrance additives; It is all natural, preservative and paraben-free. Hyaluronic acid and squalene are added for additional anti-wrinkle benefits.

Celadrin™ and Psoriasis

Another double-blind, placebo-controlled study using Celadrin™ cream for the treatment of psoriasis was performed over a 14 day period. Patients were asked to apply the cream to the affected area twice a day. Initial severity of skin scales, patchiness, redness, dryness, cracked and raised skin were recorded. Then after 7 and 14 days each patient visited the dermatologist who evaluated skin improvement. Each patient experienced a two level improvement based on the 6-point Liker scale (0 = no improvement, 5 = significant improvement). This small pilot study found that those persons using Celadrin™ cream experienced measurable improvement in their psoriasis.

Psoriasis is a difficult inflammatory skin condition to treat. Celadrin™ Super Rich Skin Therapy Cream has shown proven positive results and may provide the answer for those suffering from this inflammatory condition.

Celadrin™ Super Rich Skin Therapy Cream also helps those with eczema, rosacea and other skin conditions to help halt inflammation and heal the skin.

FORMULA:

Water, Celadrin™ 10%, Aloe Barbadosis Leaf Gel, Stearic Acid, Glycerin, Olea Europaea (Olive) Oil Unsaponifiables, Cetyl Alcohol, Stearyl Alcohol, Anthemis Nobilis Flower (Roman Chamomile) extract, Butyrospermum Parkii (Shea Butter), Panthenol, Simmondsia Chinensis (Jojoba) Seed Oil, Vitis Vinifera (Grapeseed) Oil, Sodium Hydroxymethylglycinate, Lactoperoxidase & Glucose Oxidase & Glucose, Tocopherol (Vitamin E), Hydroxyethyl Cellulose, Citric Acid, Sodium Hyaluronate, Anthemis Nobilis (Roman Chamomile) Flower Oil, Lavandula Angustifolia (Lavender) Oil, Pelargonium Graveolens (Geranium) Flower Oil, Santalum Album (Sandalwood) Oil.
